TWO ACQUITTALS.

A jury of twelve men in this city yes on trial for the shooting of her lover. A a relapse? few weeks ago another jury acquitted another woman accused of a similar crime. In the latter case no question was quittal was purely a matter of sentiment and many people thought, under the cir cumstances of a young girl's ruin and de sertion, that the case had ended properly Over yesterday's result there was much surprise. Even the counsel for the accused had expected a verdict of man

slaughter. But without commenting on the comparative merits of the two cases, or the comparative faults of the two women who were accused and acquitted, is it not time to ask where this thing is to end Cases of desertion and of jealousy very similar to these two are of frequent occurrence. They frequently end in tragedy. Is this ending to be the one licensed by the passive will of the community, under the verdicts of the community's jury? If so, what better justice is there in it all than a sort of refined lynch, law, stamped with a judicial approval?

BABES IN CIGAR FACTORIES.

Nell Nelson Describes Their Noxious Surroundings and How They Live. At the Jones Industrial School, up in East eventy-third street, some five hundred poor lttle boys and girls are enrolled.

These children come from the families of truggling Bohemians, ranging between the ages of four and twelve. Occasionally there are infantile pupils in the kindergarten, but it is a rarity to find a child in his teens in any of the upper grades. Poverty cannot en ourage higher education, however much she may admire it, and almost as soon as the hildren · look fourteen ' they are taken away om the kindly influence of the Children's Abl Society and sent to work:

The work is beautiful, for the first thoughts are of the children, albeit the

cans are far from adequate. But this week ends it all for the Summer. The schools are closed, and nothing will be one for the bables and runabouts of the poor gar-makers until next September.

It is the desire of theCorps of Free Physidang to take in all this district where the chemians live, to get the babies out of the bacco plies and out of the noisome atmoshere; tofumigate the little kitchens after the sy's toil, to clothe and feed the children and treat them with medicines, and broths that ill counteract the deadly influence of their proundings and give them a new and firm id on life.
